History of A.I.C.D.

The Australian Institute of Classical Dance Inc. (A.I.C.D.) was formed in 1991 by Marilyn Jones O.B.E., following her receipt of a prestigious Creative Arts Fellowship from the Australian Government.

The Institute has a board composed of eminent members of the dance community. It was set up to oversee and encourage the development of Australian classical ballet. It assists teachers and students of classical dance in Australia by providing a national focus for the development of this important art form. By co-operating with existing recognised dance organisations, it encourages research and the development of dance.

Since its inception, the A.I.C.D. has aimed to provide a forum for discussion on all aspects of dance and actively lobbies for classical dance in the political and educational arena.

The A.I.C.D., also acts as an assessment body, initiates workshops, runs summer schools, conventions and seminars and offers both National and International scholarships to Australian dancers and choreographers.

From its beginning, the Institute has played an important and vital role in Australia's cultural life.

The A.I.C.D. is a not for profit organisation with branches in most states of Australia. Members of the state committees serve for the betterment of classical dance in Australia, and to give support and assistance to teachers, students and choreographers in order that they can "follow their dreams" and assist with both current trends and respected traditions to stay relevant and compete successfully on both a national and international arena.

The A.I.C.D. offers various awards and scholarships throughout the year to deserving recipients, and many of the events run by the state committees are to raise funds in order for these scholarships and awards to come into fruition.

The A.I.C.D. is always looking at new, innovative ways in which they can encourage and support teachers, dancers and choreographers in the development and expansion of their technical skills and artistry through further education in the art form.

The Borovansky Syllabus

Czech-born Edouard Borovansky first came to Australia in 1929 with the company of the famous ballerina Anna Pavlova.

He returned in 1938 with a Ballets Russes Company called (at that time) The Covent Garden Russian Ballet.

Borovansky had persuaded his Russian-born wife Xenia – a fine ballet teacher who had her own school in Berlin – to accompany him to Australia, because he had decided to remain here at the end of the tour. World War II erupted in Europe in September 1939.

His idea was to start a ballet school where Xenia's marvellous teaching skills could be utilised, hoping eventually to form an Australian ballet company.

The Ballets Russes Company displayed techniques and styles of dance that were not being taught in Australia. When the Borovansky's Academy of Russian Ballet opened its studios in Melbourne in 1939, eager young ballet students and ballet lovers flocked to them to learn.

Xenia was the central pillar of classical ballet teaching, passing on the technique and style in which she had been trained in Russia.

The Borovansky Ballet Company was created, and first performed in 1940. This company was comprised of mainly Australian dancers from the Borovansky's school, featuring some artists who had remained in Australia after their tour.

Between 1940 and 1959, the company toured regularly throughout Australia, becoming a much-loved part of the Australian performing arts scene.

After Edouard Borovansky's death in 1959, Peggy van Praagh came from England to direct the company until the end of its current contract. Plans were begun for a new company, The Australian Ballet, which made its debut in November 1962.

Xenia maintained the school in Melbourne, eventually deciding to develop an Australian system for teaching ballet, based on her own Russian schooling.

Other methods, developed and administered from London, were being taken up in Australia at the time. Xenia wanted her syllabus to be administered and examined within Australia, and that is how it remains today.

Rationale of the Syllabus

The general philosophy of Xenia Borovansky and the original syllabus panel has been retained over the years, through several reviews and updates.

This philosophy includes the following premises:

The syllabus has always been **an examination syllabus** rather than a training 'method' and should be regarded separately from the work covered in general non-syllabus ballet classes. *This encourages all-round expertise of both the teacher and the student.*

The creation of enchaînements early in the syllabus, rather than separately presented steps, is to show each step in context. *This engenders appropriate dynamics and a fluid style.*

The exclusion from the syllabus of specific ports de bras and embellishments is to allow each teacher to express a personal style. *This encourages artistry.*

Pointe Work

As a Teacher

You must be aware of the different foot structures and how they can impact overall ability and longevity

Aims of the Syllabus

This syllabus aims to foster and develop;

- * A love of dance and
- * An awareness of ballet as a performing art in both recreational and vocational students.
- * Students of vocational and non-vocational aspirations are equally well-served.
- * The need for flexibility in teaching and in examining a wide variety of body shapes, sizes and capabilities is recognised.
- * Students are offered grades which are appropriate to their individual level of physical development and ability.
- * Technical difficulty increases gradationally.
- * Dance quality, style, expressiveness and musicality are encouraged from the beginning, and are progressively developed.
- * Students are exposed to a wider range of movements than appeared in earlier versions of the syllabus.
- * Steps are taught in a safe and continuous progression through all the grades. Repetitious movements have been replaced with safer, more suitable and efficient alternatives, in line with “Safe dance” principles.
- * Students are taught basic human anatomy and simple principles of physiology as it relates to ballet technique. Knowledge and understanding is developed alongside skills.
- * An awareness of dance history and context is cultivated by some sequences, and in particular by set dances.
- * Character dance steps are integrated in the syllabus, reflecting the syllabus’ heritage in the Borovansky Ballet Company, famed for its wholehearted vigorous approach to national dance.
